

MRSA Screening – Christie FT

Our policy for MRSA screening has been reviewed against the Department of Health guidance by Alison Norman our Director of Infection Prevention and Control who advises that it is compliant.

Our results from screening using this policy show that we have been successful in screening all appropriate patients described in the guidance.

Our practice has been reviewed and supported as compliant by our lead commissioner, Oldham PCT, who have written to us confirming their opinion.

I am therefore satisfied as the accounting officer to declare that we are fully compliant with the requirements for MRSA screening.
