

MRSA screening – results

Our current position for screening of appropriate admitted patients is 100%. The tables below show our 100% compliance over the last 6 months. These are uploaded monthly to Unify and reported by the DH.

December 2009				January 2010			
Number of admissions & attendances of elective patients who should be screened	Number of tests undertaken on patients who should be screened	% of elective patients who were tested	Ratio	Number of admissions & attendances of elective patients who should be screened	Number of tests undertaken on patients who should be screened	% of elective patients who were tested	Ratio
589	877	149%	1.5	568	738	130%	1.3

February 2010				March 2010			
Number of admissions & attendances of elective patients who should be screened	Number of tests undertaken on patients who should be screened	% of elective patients who were tested	Ratio	Number of admissions & attendances of elective patients who should be screened	Number of tests undertaken on patients who should be screened	% of elective patients who were tested	Ratio
603	828	137%	1.4	498	933	187%	1.9

April 2010				May 2010			
Number of admissions & attendances of elective patients who should be screened	Number of tests undertaken on patients who should be screened	% of elective patients who were tested	Ratio	Number of admissions & attendances of elective patients who should be screened	Number of tests undertaken on patients who should be screened	% of elective patients who were tested	Ratio
623	867	139%	1.4	608	824	136%	1.4
