

# Reconstructive Microsurgery - Blog

Tuesday 14th May 2019

Gold sponsor:

My name is Damir Kosutic MD PhD FRCS(Plast) and I am Consultant Plastic and Reconstructive Surgeon sub-specialist in Reconstructive Microsurgery of the Breast and Lymphoedema Surgery. I am based at The Christie, the internationally acclaimed Cancer Centre in Manchester, where I have been developing complex reconstructive cancer surgery with my colleagues for the past 5 years. Prior to Christie, I have worked in some of the most prestigious Reconstructive Microsurgery units around the world and across the UK.

Breast Reconstruction and particularly Lymphoedema Surgery and Microsurgery are some of the most evolving fields in surgery aimed at improving patients quality of life. Having completed training with some of the pioneers in this field such as Prof. Masia (Barcelona), Prof. Cheng (Taiwan) and Dr Allen (Inventor of DIEP flap/New York) I have continued for the last 15 years to contribute to this exciting field, through innovation and research to improve patient outcomes.

**This May, we are organising an exciting conference on Breast Microsurgery and Lymphoedema Treatment, which will bring together some of the top international and UK-speakers on this topic and I would like to invite everyone to join us in Manchester!"**

### **Who will be attending?**

Invited speakers - all internationally acclaimed experts in the field of reconstructive breast surgery, include:

Prof Jaume Masia-Chief of Plastic Surgery and Lymphoedema Service at Hospital Sant Pau, Barcelona, Spain and inventor of CT and MRI planning of microvascular breast reconstruction and world authority on Lymphoedema Surgical Treatment

Dr Stefania Tuinder-Consultant Plastic and Reconstructive Surgeon and inventor of TFL/LTP flap for microvascular breast reconstruction

Mr Navid Jallali, Consultant Plastic and Reconstructive Surgeon, Imperial College NHS - Charing Cross Hospital London and

Mr Shadi Ghali, Consultant Plastic and Reconstructive Surgeon, University College London and Royal Free Hospital London

....and many other experts in the field!

### **Networking Opportunities:**

Our study day will be a great opportunity for building links between lymphoedema specialists, breast cancer specialists, plastic and reconstructive surgeons, breast surgeons and breast oncologists. There will be opportunity to discuss experience and outcomes with different treatment options, learn new techniques, update on advances in imaging for planning of these procedures and much more.

### **About the conference?**

Our Conference will give you a complete update on modern reconstructive surgery following breast cancer and will cover a range of topics including not only technical aspects of microvascular breast surgery but also oncoplastic and oncological breast cancer treatment. Highlight of the conference will be modern management of Lymphoedema, including most advanced techniques of Lymphoedema Microsurgery and Super microsurgery.

We will also discuss strategies how to avoid and overcome difficult situations in microvascular breast reconstruction and have invited faculty present their most challenging cases.

**I would like to invite  
You to attend this  
exciting meeting  
and I am looking  
forward to seeing  
you all in  
Manchester on  
14/5/2019!**
