Prostate follow-up at The Christie at Oldham

Your after-care appointments following prostate cancer treatment will be delivered at The Christie at Oldham.

The clinic is staffed by specialist Christie nurses who have expertise in managing prostate cancer patients. At the appointment you will have an opportunity to discuss any concerns regarding your prostate cancer, blood test results and treatment side effects. When possible, you will be able to see the same specialist nurse at each clinic visit to help with good continuity of care. If at any point it is felt that you need to see a consultant urologist or specialist cancer doctor then you will have rapid access back into their clinic.

It is useful to have an up-to-date prostate-specific antigen (PSA) blood test performed **before** you get to the clinic so we have the results to hand on the day and we can then discuss them with you. **You need to make arrangements with your own GP practice for this blood test to be carried out 1 to 2 weeks before your appointment date. Please bring a copy of the PSA result with you.**

Your next Christie appointment will be at The Christie at Oldham. On arrival at the centre, please book in at the main reception and the clinic staff will call you through. Your appointment should last no longer than 20 minutes
